PROFILE

As a recent Ohio State University graduate with a focus on front-end web development, I am a software developer passionate about technology. My experience includes participating in hackathons and working with technologies like JavaScript, React, and GCP. I am dedicated to honing my skills and contributing to any team. My role at Apple and my time at Riverside Education Center have equipped me with a unique blend of skills. Additionally, as an entry-level data analyst and software developer, I hold certifications in the Google Data Analyst and Meta Front End programs, further enriching my professional profile.
